

**Scoring Dimensions of Data Sources – Instructor Grading Rubric
20 Points Possible**

Rubrics for A & B:

0= Dimension was not addressed or addressed but decision not supported by the data (e.g., deciding to use a test but the data are missing or non-significant).

1= Dimension was incompletely addressed (e.g., did not address issue of inconsistent validity data)

2= Fully addressed the dimension and made conclusions consistent with those data.

Rubrics for C:

0= Dimension was not addressed

1= Dimension was addressed

Dimension	0	1	2
A: Psychometric strength of the test			
1. <i>Reliability</i>			
2. <i>Validity</i>			
3. <i>Factor structure</i>			
4. <i>Responsiveness to treatment effects</i>			
B: Scope of the test:			
1. <i>Efficient Assessment of Clinical Domains</i>			
2. <i>Clinical Setting</i>			
3. <i>Similar Clients</i>			
C: Administration issues:			
1. <i>Ease of Administration</i>			
2. <i>Ease of Scoring and Interpretation</i>			
3. <i>Time Efficient</i>			
4. <i>Low cost</i>			
5. <i>Availability of Computer Support</i>			
6. <i>Validity indicator</i>
